
Dr. rer. nat. Maral Bozorgchenani studied chemistry at Ulm University, where she received her PhD in physical chemistry. In 2020, she joined the ECM group at Zentrum für Sonnenenergie- und Wasserstoff-Forschung Baden-Württemberg (ZSW). She works as postdoc and works on temperature inhomogeneity on pouch cells.

Dr. Bozorgchenani is interested in

- Effects of temperature distributions in pouch cells
- Inhomogeneous aging effects
- Degradation mechanisms of Lithium-ion cells and Post-Mortem analysis
